Summary

I am a fresh graduate in Informatics with a specialization in UI/UX Design from the Islamic University of Indonesia. Currently, I am interested in learning the role of a manual Software Quality Assurance (SQA) with the hope of bringing a unique design perspective to SQA. With expertise in Design Research and UI/UX Design, I am committed to ensuring top-quality standards for the super app's user interface and experience, contributing to exceptional user satisfaction.

Experience

Software Quality Assurance

- Enhance Quality Assurance: Validating feature flow in the super app, aligning with Sharia banking architecture standards derived from banking journals.
- Effective Defect Reporting: SQA must be able to detect and report application issues with detail and promptly for quick fixes.
- Redesign Super App: Results from innovative testing processes, delivering a fresh appearance and integrating affordability and dynamism principles to heighten user interest and convenience, ultimately driving increased user engagement.
